LO: To write a narrative including dialogue

Your task: In your book, write a narrative, including dialogue between Michael and Kensuke. Use your cartoon strip from yesterday to help you with the dialogue, and add some narrative (storytelling explaining what is happening, aside from the conversation).

WAGOLL: He was no more than a few feet away from me when he stopped. We stood looking at each other in silence for a few moments. 'Americajin? Americajin? American? Eikokujin? British?'

'Yes,' I said, relieved to have understood something at last. 'English, I'm English.'

It seemed a struggle for him to get the words out.'No good. Fire, no good. You understand? No fire.'

Success Criteria: MUST – Remember to use inverted commas at the open and close of speech, and punctuate the sentence inside the inverted commas

SHOULD – Include narrative between characters speaking

COULD – Include the full range of punctuation learnt

Plenary

Read your work aloud and make any corrections to spelling, punctuation or grammar.

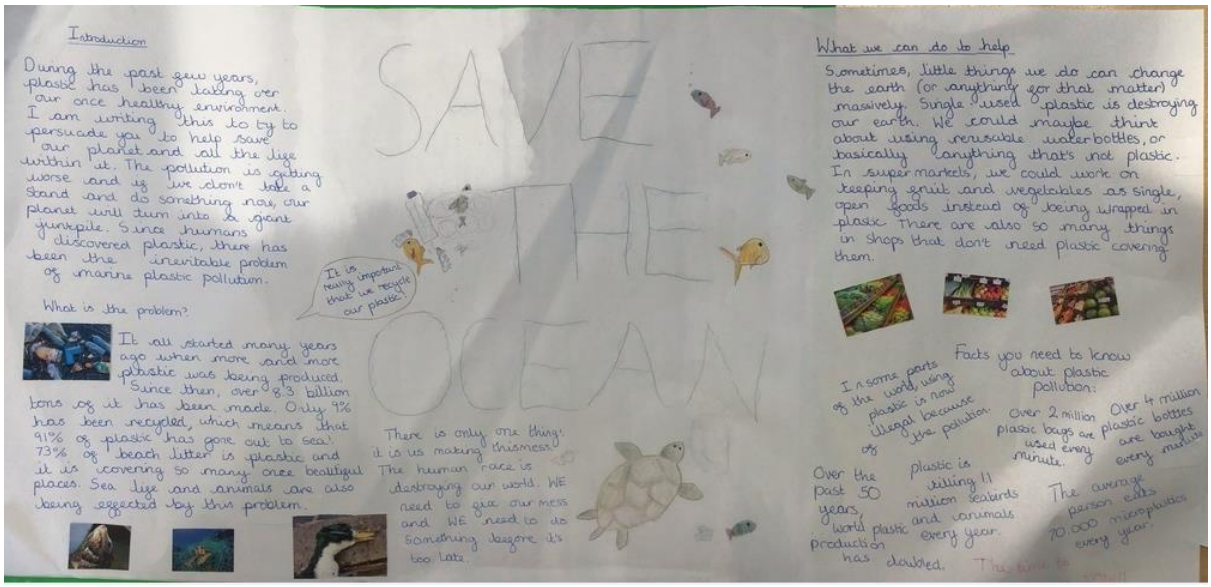
Remember to self-assess!

The Plastic Plague

What is the problem?

WE are the problem. WE are killing innocent sea animals and so many people are clueless. WE are listening and the amount of single-use plastic that enter our ocean a year is around 12.7 million tonnes. It is our fault that animal are dying. This needs to change NOW!

During the past few years, plastic has been invading and taking over our oceans. **WE** (the human race) are the **PROBLEM!** Wild marine animals are being washed up on beaches. Our once beautiful have been destroyed due to the fact of **YOUR** carelessness. This **NEEDS** to **CHANGE!**

How can WE help?


We can help by recycling and using reusable plastic such as: containers, lunchboxes, water bottles, metal straws, rubber straws and much more. I believe that we can make a difference if we all do little things like: picking up a few pieces of litter here and there, reduce the amount of plastic when it is needed. If we all help our planet it could be a healthy environment and animals would be safe.
