

History

Tuesday 14th July

We are learning ...
to put the events from the Wright Brother's lives in
chronological order.

To be successful I must...

Who were the Wright brothers?

Use the pictures to aid describing what happened.

Put events in order.

Say them out loud to check the order.

What can you remember from last week's lesson? Which early flight techniques did we look at?

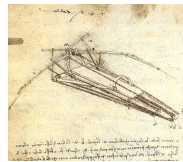

Can you remember which order these came in?

1783 Hot Air Balloon
Joseph Michel and Jacques
Etienne Montgolfier

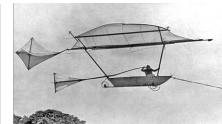

Kites in China- 5BC

1485 Leonardo da Vinci -
The Ornithopter and the Study of Flight.

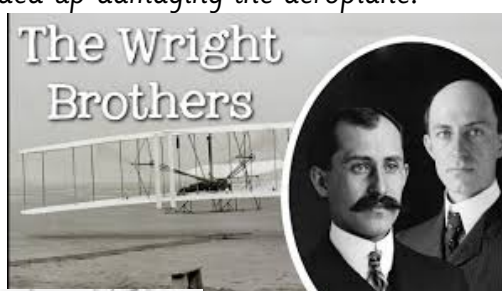

1891 Otto Lilienthal, 1891 Samuel Langley, 1894 Octave Chanute - designed gliders with engines.

Sir George Cayley built the first glider in 1743.

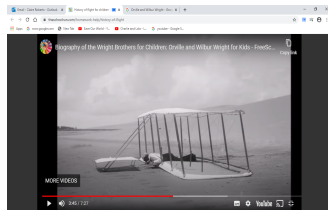

December 17, 1903 was a date that made aviation history thanks to American brothers Orville and Wilbur Wright. Orville took to the sky in his first ever motor-powered aircraft. The aeroplane, known as the Wright Flyer, flew 120 feet (36 meters) for just 12 seconds but people were amazed that their dream of flying was now possible. Wilbur Wright's first flight was not so successful – he actually ended up damaging the aeroplane!

Let's see if we can put the events in the Wright Brother's lives in Chronological order...

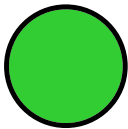

Today's task:

Everyone

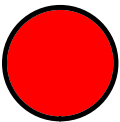

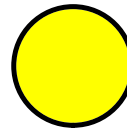

Create a timeline of the Wright brothers journey with flight.

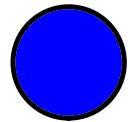

Order 3 pictures and write a caption.

Order 5 pictures and write a caption.

Order 7 pictures and write a caption.

Children at home, you don't need to print the pictures- you can write the events in order using the pictures on the screen to help you.

For example: The brothers studied how birds fly.
