

## **North Wolds Federation Intent Statement**

### **Languages**

We want the children in our Federation to be exposed to the wider world through the teaching of a second language, in our case French. It is important that our children are provided with opportunities that enable them to think outside of West Lindsey and have broad aspirations for their future. Gaining knowledge about France as a country, the French language and French culture will stimulate a curiosity of not just France but the wider world. It is our intent that our teaching of French may, at the very least, inspire children to continue to study languages at secondary school but even encourage pupils to travel, study, work or even live in the country of our closest European neighbour in later life.

As the local secondary schools deliver French, our pupils will be well prepared, right from KS1, for the next step in their French language development. Through fun engaging lessons, where children will use songs, rhymes, actions and lots of visual stimuli, our children will cover a broad range of carefully considered topics that will help form secure foundations ready for KS3.
